QUEENSLAND FOREST SERVICE

**SOUTH QUEENSLAND  
BUILDING TIMBERS  
AND SPECIFICATIONS  
FOR THEIR USE**

BY

**C. J. J. WATSON**

*Issued by the Sub-Department of Forestry,  
Department of Public Lands, under the  
Authority of the Hon. A. Jones, M.L.A.,  
Secretary for Public Lands. April, 1947.*

**PAMPHLET NO. 2**

## FOREWORD.

★

*Pamphlet No. 2 is issued by the Sub-Department of Forestry as a companion to Pamphlet No. 1, describing North Queensland Building Timbers, to complete the general specifications for timbers suitable for building over the whole of the State of Queensland.*

*As a result of the concentration of labour and materials on the war effort housing alone fell behind to the extent of more than 30,000 dwellings in this State, up to December, 1944, and the Queensland Government is now using every possible means to assist in the expansion of the building trade and the erection of urgently needed homes for the people.*

*This pamphlet, in showing how many of our lesser known woods can effectively be used in house building, can give considerable help in the present emergency.*

T. A. FOLEY,  
Minister for Lands.

30th April, 1947.
