NEW ZEALAND FOREST SERVICE
WELLINGTON — 1980

CONTENTS

	PAGE
FOREWORD—J. Y. Morris.....	4
INTRODUCTORY PAPERS	
Historical aspects of mountainland vegetation—B. P. J. Molloy.....	5
Distribution and dynamics of the indigenous forests in New Zealand with major emphasis on the beeches—J. Wardle.....	13
Types of microclimate at high elevations—H. Turner.....	21
MOUNTAIN CLIMATE	
Mountain climates from a perspective of forest growth—A. Baumgartner.....	27
Mountain climate in the Craigieburn Range, New Zealand—I. J. McCracken...	41
Light quality with special reference to UV at high altitude—M. M. Caldwell....	61
<i>Keynote Address: Forests and Climate</i> —A. Baumgartner.....	81
SUBALPINE NUTRITION	
Tree nutrient concentrations near timberline, Craigieburn Range, New Zealand—A. H. Nordmeyer	83
Phytomass, litter, and nutrients in montane and alpine grasslands, Craigieburn Range, New Zealand—G. R. Evans.....	95
TREE GROWTH AND PRIMARY PRODUCTION	
Phytomass in different tree stands near timberline—A. H. Nordmeyer.....	111
Site, leaf area, and phytomass production in trees—R. H. Waring.....	125
Specific and intraspecific growth differences in tree trials up to timberline in the Craigieburn Range, New Zealand—N. J. Ledgard.....	137
Phenological growth characteristics of trees with increasing altitude, Craigieburn Range, New Zealand—U. Benecke and W. M. Havranek.....	155
ECOLOGY AND PHYSIOLOGY OF SUBALPINE TREES	
Tree species and growth forms at timberline in different parts of the world P. Wardle.....	175
Regeneration patterns in subalpine <i>Nothofagus</i> forests in south-central Chile—T. T. Veblen.....	179
Gas-exchange of trees at altitudes up to timberline, Craigieburn Range, New Zealand—U. Benecke and W. M. Havranek.....	195
Photosynthetic production and water relations in different plant-forms as related to altitudinal gradients—E. D. Schulze.....	213
HARDINESS, DAMAGE, AND CAUSES FOR TIMBERLINE	
Causes of coniferous timberline in the northern Appalachian Mountains— P. J. Marchand.....	231
Influence of wind on tree physiognomy at the upper timberline in the Colorado Front Range—F. K. Holtmeier.....	247
Winter desiccation as the cause for alpine timberline—W. Tranquillini.....	263
Discussion—Chairman: P. Wardle.....	269
PHYSICAL AND BIOLOGICAL OPTIONS FOR TREE GROWTH ON MOUNTAIN SLOPES	
Panel Discussion—Chairman: A. F. Mark.....	280
WORKSHOP ORGANISING COMMITTEE.....	286
WORKSHOP CONTRIBUTORS.....	287
